Plastic Recycle Processing Flow

Our Business is Sustainable Production to produce such as Plastic Flake, Lots, Plastic Bottle, and Plastic Lit for domestic need only.

Strategic Plan to integrate value chain into the Region

We will connect the value chain into the region in the future after we reached the domestic needs at lease 60%. By the way, currently our product supply to the domestic market not yet reach 40%, therefore, the plan to integrate to the region might be take for long time.

Cooperation or Partnership we need

- We really need domestic partner and other organization to collect the plastic scrape to supply us as raw materials.
- we need domestic food and beverage producer to minimize the consumption of packaging product made from plastic resin but maximize to use the recycle one.
