Moringa Seed

Moringa Flower

Moringa Leaf

Khmer Moringa
Tablet

Moringa Khmer Agricultural Biotechnology Co.,Ltd has developed its healthy products from Moringa Tree Nutritional Supplement as powder, tea and tablets for local and for export to Korea and Japan, and we have implemented our business project in Cambodia toward long term financial gain, job creation for farmers in rural areas especially to achieve sustainable development strategy.

Community Activities

For high productivity of raw material collection, we have organized training session focused on planting and harvesting technology at the community area and create communication linkage between farmers and trainers to exchange information. We have offered some support as food and initial capital to our farmers while the planting is still in process.

Training

Training

In 2022, our company has plan to improve the livelihood of Khmer farmers providing the skills capacity building, job creation and market placement for new product Innovation, sustainable income and optimizing the potential for long-term success products in local and foreign markets.

To achieve our business plan:

- Develop a sustainable source of income for Rural farmers living in Rural Areas in Cambodia, Sre Ampil Koh Kong province.
- Develop a thrived integrative industry from cultivation to production manufacturing and enabling the transition from subsistence livelihoods to a cash economy
- Foster rural development and aid agricultural education on Khmer Moringa
